DETAILED ACTION

Specification

It is suggested to submit the cited references and US patent documents mentioned on pages 4 – 7 in an IDS 1449.

Claim Objection

1. Claims 16 – 20, 23 are objected to because of the following informalities: claims 16, 17 calls for " a system" while "steps" are enumerated in the preamble as "the steps". Whenever a claim refers to "the steps", one is dealing with a "method". Also, claims 18 – 20 call for "method". Claim 23 calls for both "a system" and "method". This kind of language is inappropriate. Appropriate correction is required.

Allowable Subject Matter

2. Claims 1 – 23 are allowable.
3. Reasons for allowing these claims will be provided in the next office action.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Storer (US patent Number 5,379,036) discloses a method and apparatus for data compression.
6. Ranganathan et al. (US patent Number 5,179,378) discloses a method and apparatus for the compression and decompression of data using Lempel-Ziv based techniques.

Art Unit: 2819

7. Anderson et al. (US Patent Number 5,406,279) discloses a general purpose, hash-based technique for single pass lossless data compression.

8. This application is in condition for allowance except for the following formal matters mentioned above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 2819
